[Instructions]

THELANOVA *ENERGY BOOSTER*

Manage your body with bioscience for a healthier life.

Energy therapy device with no electric current appliance

ThERANOVA ENERGY BOOSTER

It is a new professional body care device, which combines electro stimulation, decompression, shock, and thermos therapy. Contracting and relaxing muscles by electrical stimulation, it helps to release body energy, stimulates blood circulation and gives massage like effect to stiffed muscles, reinforce body functions and helps to loose weight.

4 in 1 Therapy.

ThERANOVA
ENERGY BOOSTER

Energy Therapy

- Delivering micro currents deep into body tissues, it is the whole body activation therapy, that helps to detoxicate body, relaxes muscles and stimulates lymph circulation
- Deliver stronger energy effectively through a dedicated applicator without causing discomfort to the operator.

Decompression Therapy

- Therapy that helps to relax muscles, relief pain and stimulates blood circulation by sucking and releasing motions
- Stimulate muscle recovery by inducing increased blood flow in the capillaries to supply more oxygen
- Give work out and anti-cellulite effects

Heat Therapy

- Therapy gently warms up a body and help to relax muscles and effectively reduce pain
- Can be used on every body part due the temperature regulation function

Wave Therapy

- Therapy relieves discomfort caused by intense management by gently shaking the musclesto relax them.
- Training and weight loss effects

Energy Booster Effects

1 Working out effect, wight loss

By stimulating the peripheral nervous system through microcurrents, this therapy induces muscle contraction and relaxation, resulting in energy expenditure. Gives effect of real training and weight loss on applying area

2 Muscular pain care

Due a muscles stimulation with low voltage, this therapy make muscles contract and relax naturally by themselves, which helps to relax tense muscles and reduce muscle pain

3 Circulation increase

Bio electricity gives stimulus to nerve fiber, regulates functions of organs and organ groups, speeds up metabolism, and stimulates blood circulation by contracting muscles the same way as training does.

4 Skin texture improvement and aging preventing.

Improving blood alkalinity and facilitating the function of the autonomic nervous system, this therapy stimulates cells metabolism, preventing aging phenomenon. Also it stimulates sebum secretion and helps to improve skin texture.

* Differently designed applicators allow to work on any body part

Do I need it?

Yes, you need it, If you

- Need body conditioning
- Want to improve your range of motions
- Need to recover your muscles after work out
- Need muscles relaxation
- Have troubles with body circulations
- Concern about cellulite
